

Inline blade fuse holders provide a wide variety of circuit protection options

Product description:

The Eaton Bussmann® series of inline and Add-A-Fuse blade fuse holders and taps meet a variety of automotive and marine circuit protection needs.

Easily applied for adding circuits to power accessories, inline blade fuse holders are available up to 60 amps.

Bussmann series inline blade fuse holders are available for the new, micro ATR blade fuses, compact ATM and low-profile ATM fuses, popular ATC fuses and, for high power needs, MAX fuses.

Package options include traditional, retail and bulk packs.

Inline holders are available for ATR, ATM, ATC and MAX blade fuses

Features and benefits:

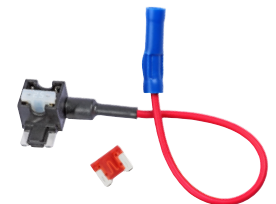

- Now available for ATR micro fuses, conventional holders meet basic needs for circuit protection. Available ATR, ATM, ATC and MAX fuses.

- Gasket-sealed holders seal out contaminants. Available for ATM and ATC fuses and are ideal for trailers and marine applications where water infiltration is a problem.

- *easyID™* holders indicate a blown fuse. Available for ATM, ATC and MAX fuses.

- Add-a-fuse holders plug into fuse blocks to create a new, fused circuit for auxiliary and accessory loads. Available for the new ATR micro fuses, ATM and low-profile ATM and ATC fuses.

Eaton Bussmann series inline blade fuse holders are available in a variety of styles and ratings to meet your customer's circuit protection needs.
